ACADEMIC DRESS

THE REGALIA worn by those participating in the graduation ceremonies today has a colorful history.

Regalia originated in the monasteries of the Middle Ages. At that time teachers at the universities were men of religion and wore the habit of their Order while teaching. With the passage of time their garments came to identify their university.

In Europe it was not until the 19th century that laymen were commonly found teaching in universities. In 1858, for example, British law made it no longer mandatory for university dons to be in holy orders. University teachers nevertheless continued to wear clerical garb, with modifications in cut and design, as academic dress.

Regalia colors were often those of the university patron or of the city in which the university was located. Simon Fraser regalia combines the red and royal blue of the Clan Fraser and the University motto "nous sommes prêts" (we are ready) is a modification of the Clan motto "je suis prêt".

The hood was originally part of the monk's habit and was sometimes used as a carryall for small items such as food while the wearer was traveling. In time the hood was disconnected from the gown, became variegated in color, and was used to identify scholars and degrees from a designated university. Hoods in Canada and Europe are unique in design and color combination to each degree and each university.

The mortarboard worn by our Bachelors and Masters was worn by high church dignitaries in the 16th century and consisted of little more than a cap with a squared crown raised above the cap. By the 18th century the crown was frankly a cloth-covered board but now was worn by deans and rectors of the universities. In the 19th century the knob on top was replaced by a tassel and the cap became required head covering for university students. Because of the square shape, the cap reminded students of the square board used by masons for holding mortar and the headgear was dubbed "mortarboard" — college slang of the day.

Doctoral hats were patterned after the Florentine hats that were the mode in Italy in the time of the Medici. These hats were purchased by students in the color of their university and were worn after the Bachelor degree had been completed and the students were continuing with advanced studies.

UNIVERSITY HISTORY

The University Coat of Arms was granted to the University in 1965 by the Lord Lyon King of Arms.

The heraldic description of the Flag is:

“Quarterly; 1st and 4th, Azure, three fraises Argent
; 2nd and 3rd, Argent, three antique crowns Gules, in chief
Gules an open book proper, binding and fore-edges, Or,
between two crosslets fitchée of the last.”

The Coat of Arms was derived from that of the Clan Fraser. The name Fraser is said to have come from the French word “fraises”, meaning strawberries, hence the Shield and Flag each include the strawberry flower motif.

The mace was commissioned by the University architects, Erickson-Massey, and was presented to the University at the opening ceremonies on September 9, 1965. The mace is sixty-one inches long and weighs twenty-three pounds. Pieces of cut and polished jade, which were taken from the University's jade boulder in the reflecting pool, were set in silver by its designer, Haida artist, Bill Reid. The mace is crowned by a silver stag's head, derived from the coat-of-arms of Lord Lovat, head of the Clan Fraser. The Fraser tradition was to fasten sprigs of yew in their bonnets before entering battle. The mace was therefore carved from two hundred year old yew, gathered on Burnaby Mountain by a resident in the 1940s.

Lord Lovat presented the University with a claymore, or great sword, on September 9, 1965. The claymore was first used by a Fraser at the Battle of Culloden Moor in 1746. It was also used by a Fraser at the Battle of the Plains of Abraham in 1759. The claymore is approximately 36 inches long and weighs two pounds.

The Flag was dedicated and flown for the first time at the Convocation ceremonies in June, 1981.

SCHOOL OF ENGINEERING SCIENCE

This year's Convocation marks the first time the degree of Bachelor of Applied Science has been awarded.

This demanding program began in September 1983 with students entering first and second years of the program. Students choosing this field have focussed on advanced technology industries combining a solid background in science with intensive engineering courses in electronics and computing.

Since the program's inception, our charter Engineering Science graduands have completed a minimum of eight months working in outside industry as part of their studies. They have also completed a thesis based on an industrially applied undergraduate project.
