

Introduction to Archaeology

Archaeology 201

Section: d100

Term: 2008 Spring

Instructor: Dr George Nicholas

Discussion Topics: Archaeology offers us the means to discover, interpret, and learn from the tremendous cultural diversity that comprises humankind, both in the past and today. This course provides an introduction to the basic methods and theories employed by archaeologists. It includes a review of the research strategies, field methods, and interpretive approaches that illustrate how archaeologists know what they know about the past, and also examines different approaches to environmental reconstruction, subsistence and health, past social and economic systems, gender, and ideology. Other topics to be discussed include the history of the discipline, the identification of popular myths and misconceptions about archaeology, applications of the field in the modern world, and also the potential roles that archaeology has for Indigenous peoples and other descendant communities worldwide. This is a lecture course with no tutorials. Students will be evaluated on the basis of two examinations, three in-class quizzes, and one take-home exercise.

Grading: Mid-term examination 35%; Final examination 40%; Quizzes (3 at 5% each) 15%; Take-home exercise 10%

Required Texts: Archaeology,, 4th ed. D. H. Thomas and R. L. Kelly Wadsworth ISBN-10: 0155058991

Recommended Texts: none

Materials/Supplies: none

Prerequisite/Corequisite: none

Notes: Deferred grades will only be given on the basis of authenticated medical disability
