## THE UNIVERSITY COAT OF ARMS

The University Coat of Arms was granted to the University in 1965 by the Lord Lyon King of Arms.

The heraldic description of the Flag is:

“Quarterly; 1st and 4th, Azure, three fraises Argent  
; 2nd and 3rd, Argent, three antique crowns Gules, in  
chief Gules an open book proper, binding and fore-edges Or,  
between two crosslets fitchée of the last.”

The Coat of Arms was derived from that of the Clan Fraser. The name Fraser is said to have come from the French word “fraises”, meaning strawberries, hence the Shield and Flag each include the Strawberry flower motif.

The Flag was dedicated and flown for the first time at the Convocation ceremonies in June, 1981.

## FACULTY OF ENGINEERING SCIENCE

The new Faculty of Engineering Science, launched in September, 1983, offers a program that is broadly based, high quality, limited enrollment and academically demanding. It is a unique approach to applied science education, going significantly beyond conventional engineering programs. Students are required to participate in an industrial internship in an appropriate industrial or institutional setting, exposing them to “real world” problems. The program’s goal is to produce well educated, innovative engineer-scientists with entrepreneurial skills and attitudes, oriented to the new technologies.

Graduates will work in some of the most challenging fields in high technology such as microelectronics, communications, computing, bio-medical engineering and robotics and industrial automation. Plans are to develop programs in the chemical, biochemical processing and biotechnology areas.

The Faculty of Engineering Science, by concentrating on the new technologies and cooperating closely with industry, will make a significant contribution to the present and future industrial development of British Columbia.

**T** HE REGALIA worn by those participating in the graduation ceremonies today has a colorful history.

Regalia originated in the monasteries of the Middle Ages. At that time teachers at the universities were men of religion and wore the habit of their Order while teaching. With the passage of time their garments came to identify their university.

In Europe it was not until the 19th century that laymen were commonly found teaching in universities. In 1858, for example, British law made it no longer mandatory for university dons to be in holy orders. University teachers nevertheless continued to wear clerical garb, with modifications in cut and design, as academic dress.

Regalia colors were often those of the university patron or of the city in which the university was located. Simon Fraser regalia combines the red and royal blue of the Clan Fraser and the University motto "nous sommes prêts" (we are ready) is a modification of the Clan motto "je suis prêt".

The hood was originally part of the monk's habit and was sometimes used as a carryall for small items such as food while the wearer was travelling. In time the hood was disconnected from the gown, became variegated in color, and was used to identify scholars and degrees from a designated university. Hoods in Canada and Europe are unique in design and color combination to each degree and each university.

The mortarboard worn by our bachelors and masters was worn by high church dignitaries in the 16th century and consisted of little more than a cap with a squared crown raised above the cap. By the 18th century the crown was frankly a cloth-covered board but now was worn by deans and rectors of the universities. In the 19th century the knob on top was replaced by a tassel and the cap became required head covering for university students. Because of the square shape, the cap reminded students of the square board used by masons for holding mortar and the headgear was dubbed "mortarboard" — college slang of the day.

Doctoral hats were patterned after the Florentine hats that were the mode in Italy in the time of the Medici. These hats were purchased by students in the color of their university and were worn after the bachelor degree had been completed and the students were continuing with advanced studies.
