

## **Special Topics in Sustainable Community Development**

Sustainable Community Develop. 410

Section: E100

Term: 2012 Summer

Instructor:

Discussion Topics: Builds knowledge of the ecological, human and economic impacts of current building development patterns both at the level of the individual building but also the community. Presents the history of the green building movement and industry in North America, with a look at policy history, as well as the history of certifications and rating systems, the history of the actors involved, as well as some history of history-changing sustainable or green buildings and communities. Ties these building and community development concerns into theories and concepts of both leadership and change, to ask participants: "How should I/we shape the future of green building and sustainable community development? And where do we start?"

Grading:

Required Texts:

Recommended Texts:

Materials/Supplies:

Prerequisite/Corequisite: CED or SCD 301 or permission of the Director for SCD. Students who have taken CED or SCD 410 with the same topic for credit may not take this course for further credit.

Notes:

This outline is derived from a course outline repository database that was maintained by SFU Student Services and the University's IT Services Department. The database was retired in 2014 and the data migrated to SFU Archives in 2015.
